## WB08-UPHOLSTERED STOOL Care Guide

- As a natural material, wood will continue to move and be affected by its surroundings.
- Changes in humidity and temperature can lead to warping and /or cracks in the wood. Therefore, it is advisable not to place your furniture against a direct heat source or air conditioning unit.
- Over time, with changes in the atmosphere and light, the wood will mellow.
- To ensure an even tone we recommend that it is not left in direct sunlight and any objects placed on the furniture should be regularly moved around to help avoid colour differences.
- If you have chosen an extending dining table, it may be beneficial to leave your table extended for a period to allow the extension leaf to mellow with the rest of the tabletop.
- Your furniture has been finished with an NC Lacquer.

### General care

- Always lift your furniture to move it, never drag or push it as this can cause damage.
- Regularly check all fixings and tighten if necessary. Wipe with a soft, slightly damp, lint free cloth.
- Buff timber surfaces with a dry, clean cloth. Wipe up spills immediately, never leave liquids sitting on the surface as this can damage the finish.
- Keep upholstered furniture out of direct sunlight to avoid fading.
- Do not place items directly against radiators or a heat source.
- Vacuum regularly to remove dust and dirt.
- Take care when sitting on light coloured fabrics when wearing items with transferable dyes such as Denim Jeans.
- Blot any spills immediately with a clean lint free cloth or paper towel.
- Never rub or scrub the spill as this may cause it to spread and stain.
- We would recommend calling a professional upholstery cleaner to clean any stubborn marks or stains.
